**Overtime pay is calculated proportionally to the number of hours you work at each rate.**

This is known as a "blended rate".

- You worked 48 hours this week: 36 hours at weekday rate and 12 hours at the weekend rate

- This may change weekly based on your hours, so your OT rate for **this week** is calculated like this:

12 hrs (orange)	Weekend ($25) 25% of total hrs: means that 25% of your OT rate will be based on *weekend* pay $25 x 25% = $6.25
36 hrs (blue)	Weekday ($21) 75% of total hrs: means that 75% of your OT pay will be based on *weekday* pay $21 x 75% = $15.75

6.25 + 15.75 = $22.00 avg hourly rate x 1.5 = **$33 OT rate**

$33 x 8 OT hrs = $264 OT pay

(this calculation only shows the overtime amount)
